DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 7/26/2006 is acknowledged by the examiner.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Pat. No. 1-92565. Japanese Pat. No. 1-92565 discloses a valve comprising a body (102), a valve seat (114), a bonnet (100), a diaphragm (116), a peripheral edge (adjacent the lead line for element 117), an elastic member (119), an annular groove (117), an L-shaped annular engagement part (116b), an inclined surface (adjacent the lead line for element 116b, inclined at an angle of 90 degrees), an annular projection (corner adjacent element 117) abuts (via element 118) the diaphragm (116), and wherein the annular projection is provided near the clamping (figure on the cover of the patent).

Regarding the “O-ring”, the examiner takes official notice that the elastic member (119) could be replaced by an “O-ring” since it is well known in the art that these types of circular seals are interchangeable.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 6,959,725 (Yoshino et al.) discloses an L-shaped engagement member.
